

## Farmer Testimonials

### Testimony of Mr. Dasaratham

#### Reaping the Benefits of Chisel Plough in his Field

"Vanakkam !!! My name is Dasaratham, I am a member of the Vivekananda Farmers Mandalam in Vallam Village. Farming has been my traditional occupation; however it was not very profitable for me till now. I have been trained by Apollo Tyres Foundation and National Agro Foundation on various Lean farming techniques and to use the Chisel Plough in my field. After the training and implementation of the same on my field, I am able to see that plants are growing uniformly and there is adequate moisture retention in the soil. We need to take this information and training to many more farmers, so they too can benefit from such technology. We would like to re use this again and do it by ourselves so we

ourselves can help train the other farmers and share this knowledge with them also. All the plants in my field are growing so uniformly and the outcome is very visible after use of the chisel plough. I am very grateful to Apollo Tyres Foundation and National Agro Foundation for helping us to improve our yield and agricultural practices."
